GRINDING WHEELS FOR INDUSTRIES

STORM CAT
GROUP

Your gateway to
manufacturing outsourcing

ROLL GRINDING WHEELS

- Grinding work rolls and back-up rolls used in Hot / Cold / Sendzimer / Aluminium foil / Paper / Stainless steel mill
- Grinding chrome-plated rolls
- Grinding rubber rolls

NUT INSERTED GRINDING WHEELS

- Bearing face grinding
- Piston ring face grinding
- Spring end grinding
- Connecting rod face grinding
- Valve plate grinding

CYLINDRICAL GRINDING WHEELS

- Used in grinding of Valves, Plunger pins, Transmission shafts, Bearing races, Eye bolts etc.
- O.D. Plunge grinding
- Angle head grinding

GEAR GRINDING WHEELS

- Gear / Pinion grinding (Worm / Spur / Helical gear)

MOUNTED POINTS, PLUGS & CONES

- Used for Deburring, Tool Sharpening, Finish Cavities, Smoothing intricate profile of Castings & Forging, Die grinding etc.

SEGMENTS

- Grinding of Bearing, Connecting Rod, Valve Plate, Industrial Plate etc.

CENTRELESS GRINDING WHEELS

- Bearing race OD ring grinding • Bar grinding
- Auto part grinding (Shock absorbers, Gudgeon pins, Engine valves, Dowel pins, Tubes, Rods, Piston pins etc)

SNAGGING WHEELS

- Cleaning of castings • Billet conditioning
- Smoothing of weld seams
- Preparing surface for plating or painting

INTERNAL GRINDING WHEELS

- Internal Grinding wheel are used in Internal & External of bearing, small cylinder, compressor parts, injection Nozzle parts, Gear parts etc.

TOOL ROOM GRINDING WHEELS

- Used for grinding of cutting tools like Drills, Reamers, Milling cutters, Gears, Hobs etc.

GENERAL PURPOSE GRINDING WHEELS

- Available in Aluminum Oxide & Silicon Carbide
- Used in Bench, Floor Stand & Pedestal Grinders

CRANK SHAFT GRINDING WHEELS

- Grinding of Crank Pin or Bearing by Plunge form method

HYPODERMIC NEEDLE GRINDING WHEELS

- Used for tip grinding of human and veterinary needles

CERAMIC GRINDING WHEELS

- Faster material removal • Reduction in cycle time
- Ideal for CNC machine application
- Better productivity

STICKS & STONES

- Available in square, rectangular & round shape
- Used to give accurate finish on internal part of automobile cylinder head and other components

RUBBER CONTROL WHEEL

- Used in Bearing, Automobile, Hydraulic, Cutting tool industries.
